Language

6. Nineteenth-century classical linguistics did achieve permanent results as regards the genetic relationship of language, results that constitute an essential side of linguistics. They will be presented here, however, in adjustment to new points of view, and they will be looked at somewhat differently from the way in which they perhaps were seen at the time of their discovery.
- 7.
9. relationship
21. genetic relationship element function between their system
30. operational definition of genetic relationship
31. one linguistic studies how function into the
37. elements and their relational possibilities
40. He studies out not the way that determine the identity of a language and define as language as opposed to another.
