hoc is Kjel 3lcv vilos'.) matics and Contemporary Linguistic Theory

fyrj-. If I

Addition to Tape Record of Second Lecture (end) (transferred from Hecture)

Glosseraatic theory (in accordance with the theory of the Linguistic Circle of Prague) (and in contradistinction to certain modern linguistic theories) recognizes syncretisms as such* A syncretism '•neutralization**') is the result of a suspended commutation* in Danish, p and b are commutables, witness pære 'pear, bulb' j bære 'wear, carry' T ~this commutation is suspended at the end of a syllable, resulting in the syncretism g/b , as in the word which in orthography is written kop 'cup', but may be pronounced with $/-p/$ or

is an obligatory representative of the syncretism: liig with $-\text{a}$, dfgz with $-\text{z}$. It can be seen from this ending occurring in free position (after a vowel), e.g. aiz ("eyes"), that its "ideal form" is $\text{™ j} \bullet \# \text{K}'\text{c}+\text{o1}' \text{la}$
